EDUCATION

THE CITY COLLEGE OF NEW YORK **New York, NY**

Bachelor of Science in Computer Science and Applied Mathematics **Expected Dec 2027**

Honors & Awards: Dean's List (All Semesters); William G. Wright Scholarship – Black Alumni Group **GPA: 3.8/4.0**

TECHNICAL SKILLS

- **Languages:** C++, Python, Java, HTML, CSS, TypeScript, SQL, MIPS
- **Design & Development:** UI/UX design, Wireframing, React, Next.js, Bootstrap, APIs, OOP, Data Structures
- **Tools:** Git/GitHub, Figma, Wix, CMS Collections, Bootstrap, Roblox Studio, VS Code, Arduino, PySerial

EXPERIENCE

CUNY Tech Prep | Full-Stack Web App Development Fellow | New York, NY | Jul 2026 - Present

- Strengthening full-stack software engineering skills through technical coursework, mentorship, collaborative projects, and interview preparation in a competitive year-long fellowship.
- Building proficiency across modern web technologies including JavaScript, React, Next.js, databases, cloud technologies, testing, and CI/CD through hands-on development.

Develop for Good | UI/UX Designer Volunteer | Remote | May 2026 - Aug 2026

- Improved the user experience of a nonprofit website as part of a 6-person team of designers and engineers, creating wireframes, prototypes, user flows, animations, and page layouts in Figma and Wix for Melanate.
- Strengthened accessibility and user engagement by applying information architecture and visual storytelling while iterating with stakeholders, designers, and industry mentors.

CUNY Tutor Corps | Mathematics Tutor | Bronx, NY | Sep 2026 – Present

- Provide high-impact Algebra I tutoring and classroom support to middle and high school students through one-on-one and small-group instruction, strengthening foundational math skills and confidence.
- Participate in monthly professional development focused on pedagogy, math content, and effective tutoring strategies while collaborating with classroom teachers to support student learning.

PROJECTS

Corse Canvas | AI-Powered Academic Planning Web App | CUNY Tech Prep Hackathon Winner

- Developed an AI-powered web application that transforms course syllabi into organized dashboards with assignments, exams, policies, and personalized study roadmaps.
- Collaborated on the product's frontend and UI/UX design and presented the project at CUNY Tech Prep Hacks, earning the Best Demo Award.

Knee Guard | AI-Powered ACL Recovery System Web App| CCNY Biodesign Hackathon Winner

- Created an adaptive ACL recovery experience by developing an app with HTML/CSS, Java, and Python (PySerial) to simulate real-time sensor tracking.
- Connected hardware and software components by contributing to Arduino integration for a wearable knee sleeve prototype.

LEADERSHIP

Women in Computer Science (WiCS) | Secretary & Newsletter Chair | CCNY | Jan 2026 – Present

- Lead member communications through newsletters, promotional materials, Discord updates, and internship/opportunity outreach.
- Help organize professional development and community events, including workshops, general body meetings, and technical events.
